RESPONSE MODE

Self-report

INSTRUMENT

CORE-10

SOURCE

CORE System Trust

CLINICAL ROLE

**Brief outcome
monitoring for
clinician review**

What this report lays out

- Named instrument, version, and provenance
- Item-level response pattern without source wording
- Methodology, references, and clinical boundary
- Responsible clinician review rather than automated conclusions

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored CORE-10 result, cannot establish a diagnosis, and must not be placed in a clinical record.

CORE-10 does not diagnose a condition or determine therapy type. It is routine outcome evidence for clinician review.

A report designed for clinical review

Clear structure, visible provenance, and an explicit boundary help a clinician review recorded evidence without mistaking a questionnaire for a conclusion.

REVIEW

Clients complete ten items, often repeatedly. Item-level review still matters, including any concerning risk-related response. Lirena does not provide urgent monitoring.

CONTEXT

Official CORE materials describe scoring. This page does not independently verify cutoffs. Use the authorised CORE-10 form, not an improvised item mix.

SOURCE

Confirm the exact CORE form you intend. This catalogue entry does not assign CORE-10 from the public site.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

Item-level layout without source wording

This marketing sample uses invented item numbers and response labels only. It does not reproduce CORE-10 item wording, and the pattern below is not a real result.

ITEM	ILLUSTRATIVE SCALE POINT	FICTIONAL RESPONSE
1	4 of 5	Often
2	3 of 5	Sometimes
3	3 of 5	Sometimes
4	5 of 5	Most days
5	2 of 5	A little
6	3 of 5	Sometimes
7	3 of 5	Sometimes
8	3 of 5	Sometimes
9	4 of 5	Often
10	5 of 5	Most days
11	4 of 5	Often
12	5 of 5	Most days
13	5 of 5	Most days
14	3 of 5	Sometimes

Item numbers, scale points, and responses on this page are invented for layout demonstration. They are not this instrument's item set, scoring structure, or thresholds.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

CORE-10 is a short derivative of CORE-OM used to track change across sessions. It covers well-being, problems, functioning, and risk-related items at a high level. It is not a set of diagnosis subscales.

ADMINISTRATION

Clients complete ten items, often repeatedly. Item-level review still matters, including any concerning risk-related response. Lirena does not provide urgent monitoring.

CLINICAL BOUNDARY

CORE-10 does not diagnose a condition or determine therapy type. It is routine outcome evidence for clinician review.

GOVERNANCE

Confirm the exact CORE form you intend. This catalogue entry does not assign CORE-10 from the public site.
