

**SYNTHETIC EXAMPLE**

Fear of Cancer Recurrence Inventory - Short Form

FCRI-SF - presentation preview

CLIENT

John Doe

ADMINISTERED

Example date

RESPONSE MODE

Self-report

INSTRUMENT

FCRI-SF

SOURCE

Simard and Savard

CLINICAL ROLE

**Fear-of-recurrence
screening support for
clinician review**

What this report lays out

- Named instrument, version, and provenance
- Item-level response pattern without source wording
- Methodology, references, and clinical boundary
- Responsible clinician review rather than automated conclusions

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored FCRI-SF result, cannot establish a diagnosis, and must not be placed in a clinical record.

FCRI-SF is not a diagnosis. A result cannot replace clinician-led assessment, history, examination, or investigation where those are required.

A report designed for clinical review

Clear structure, visible provenance, and an explicit boundary help a clinician review recorded evidence without mistaking a questionnaire for a conclusion.

REVIEW

FCRI-SF is completed as a focused self-report and stored for clinician review. This public page does not collect answers or return a score.

CONTEXT

Published scoring conventions may exist in official materials. This public page does not independently verify scoring, cutoffs, or a production scoring rule. Use the official form and scoring instructions for the version you intend to use.

SOURCE

Catalogue information on the measure's purpose, source and administration requirements. Check the official administration guidance and suitability for your clinical purpose.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

Item-level layout without source wording

This marketing sample uses invented item numbers and response labels only. It does not reproduce FCRI-SF item wording, and the pattern below is not a real result.

ITEM	ILLUSTRATIVE SCALE POINT	FICTIONAL RESPONSE
1	5 of 5	Most days
2	5 of 5	Most days
3	2 of 5	A little
4	2 of 5	A little
5	4 of 5	Often
6	2 of 5	A little
7	3 of 5	Sometimes
8	4 of 5	Often
9	1 of 5	Not at all
10	3 of 5	Sometimes
11	4 of 5	Often
12	5 of 5	Most days
13	1 of 5	Not at all
14	2 of 5	A little

Item numbers, scale points, and responses on this page are invented for layout demonstration. They are not this instrument's item set, scoring structure, or thresholds.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

The Fear of Cancer Recurrence Inventory Short Form organises how strongly a person worries that cancer will return. Screening evidence around a total of 22 is a prompt for clinician review. The total is not a diagnosis and not a treatment recommendation.

ADMINISTRATION

FCRI-SF is completed as a focused self-report and stored for clinician review. This public page does not collect answers or return a score.

CLINICAL BOUNDARY

FCRI-SF is not a diagnosis. A result cannot replace clinician-led assessment, history, examination, or investigation where those are required.

GOVERNANCE

Catalogue information on the measure's purpose, source and administration requirements. Check the official administration guidance and suitability for your clinical purpose.
