RESPONSE MODE

Self-report

INSTRUMENT

**PROMIS Cognitive
Function 8a**

SOURCE

HealthMeasures / PROMIS

CLINICAL ROLE

**Cognitive-complaint
screening support for
clinician review**

What this report lays out

- Named instrument, version, and provenance
- Item-level response pattern without source wording
- Methodology, references, and clinical boundary
- Responsible clinician review rather than automated conclusions

CLINICIAN REVIEW REQUIRED

This document demonstrates Lirena's report design using fictional data. It does not represent a scored PROMIS Cognitive Function 8a result, cannot establish a diagnosis, and must not be placed in a clinical record.

PROMIS Cognitive Function 8a is not a diagnosis. A result cannot replace clinician-led assessment, history, examination, or investigation where those are required.

A report designed for clinical review

Clear structure, visible provenance, and an explicit boundary help a clinician review recorded evidence without mistaking a questionnaire for a conclusion.

REVIEW

PROMIS Cognitive Function 8a is completed as a focused self-report and stored for clinician review. This public page does not collect answers or return a score.

CONTEXT

Published scoring conventions may exist in official materials. This public page does not independently verify scoring, cutoffs, or a production scoring rule. Use the official form and scoring instructions for the version you intend to use.

SOURCE

Catalogue information on the measure's purpose, source and administration requirements. Check the official administration guidance and suitability for your clinical purpose.

REPORT PRINCIPLE

Show the evidence, the version, and the boundary. Leave diagnosis and formulation with the clinician.

Item-level layout without source wording

This marketing sample uses invented item numbers and response labels only. It does not reproduce PROMIS Cognitive Function 8a item wording, and the pattern below is not a real result.

ITEM	ILLUSTRATIVE SCALE POINT	FICTIONAL RESPONSE
1	2 of 5	A little
2	2 of 5	A little
3	1 of 5	Not at all
4	3 of 5	Sometimes
5	2 of 5	A little
6	5 of 5	Most days
7	1 of 5	Not at all
8	1 of 5	Not at all
9	1 of 5	Not at all
10	5 of 5	Most days
11	2 of 5	A little
12	5 of 5	Most days
13	1 of 5	Not at all
14	4 of 5	Often

Item numbers, scale points, and responses on this page are invented for layout demonstration. They are not this instrument's item set, scoring structure, or thresholds.

Source-led by design

Lirena separates published methodology, product implementation, and clinical approval. A citation does not by itself authorize administration or prove a software scoring rule.

INSTRUMENT

The PROMIS Cognitive Function 8a short form records seven-day cognitive complaints for clinician review. Lirena stores a raw total. Convert to a standardised score only with the official table. The result is not a diagnosis of cognitive impairment.

ADMINISTRATION

PROMIS Cognitive Function 8a is completed as a focused self-report and stored for clinician review. This public page does not collect answers or return a score.

CLINICAL BOUNDARY

PROMIS Cognitive Function 8a is not a diagnosis. A result cannot replace clinician-led assessment, history, examination, or investigation where those are required.

GOVERNANCE

Catalogue information on the measure's purpose, source and administration requirements. Check the official administration guidance and suitability for your clinical purpose.
